

\*Sheerweave 90% Shade Available

\*Integrated Frame Available

The Horizon screen sets the standard for large retractable screens. Featuring a flat handle, auto-compensating upper track and a low-profile lower track, the Horizon complements large architectural doors of nearly any type and configuration.

### Size Up to :

**Width**      **Height**

**Singles**      **21'6"**      **11'**

**Doubles**      **43'**      **11'**

### Benefits :

Clear Vision

Wheelchair Friendly

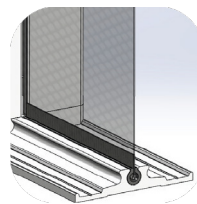

Insect Control

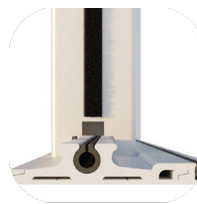

### Patented Auto-Stop

The handle features a pull function and sleek flat profile, offering homeowners full control with unlimited brake points. The pull-bar stops anywhere along the tracks when released.

### Captured Mesh

Specialized equipment welds the mesh to the zipper. The tracks capture the zippers, and the mesh is retained all times. No blowouts, frayed mesh or pets on the loose!

### Low Profile

At only 1/2" high, the lower track blends seamlessly into every application. It's designed for simple installation and provides for a smooth transition between spaces.

\*Screens Tested to withstand wind speeds over 75 mph.

*A View Towards Excellence*
